What was done really well during this training that definitely needs to be done again in the future training like this?

5 responses

Concepts were communicated clearly and in a concise manner, examples were easy to understand

Good explanation of the history and value of LEAN

Good slides, pace of presentation and examples provided to tie into the presentation material.

Hands on activity.

I think it was a really good explanation of the key concept of Lean with some good examples. The example with the drop off at the school was a really good one showing how lean can be applied in our every day life
